

## **CLAIMS**

1. (Once amended) A portable infant bed comprising:
  - a. A support unit including
    - a generally rectangular flat base panel having two parallel longitudinal sides and two parallel ends,
    - a detachable end wall perpendicularly attached at one end of said panel, and
    - a pair of detachable parallel walls perpendicularly attached to the two longitudinal sides of said base panel and to said end wall;
  - b. a fabric cover fitting over said base panel, side walls and end wall of said unit, said cover extending beyond the opposite end of said base panel; and
  - c. a generally rectangular pad that fits against said end wall and side walls, said pad extending beyond said base panel and over said extended cover.
2. (Twice amended) A portable infant bed comprising:
  - a. a support unit including
    - a generally rectangular flat base panel having two parallel longitudinal sides and two parallel ends,
    - an end wall perpendicularly attached at one end of said panel, and
    - a pair of parallel side walls perpendicularly attached to the two longitudinal sides of said base panel and to said end wall wherein said base panel, end wall and side walls are integrated into a single unit;
  - b. a fabric cover fitting over the base panel, side walls and end wall of said unit, said

cover extending beyond the opposite end of said base panel; and

c. a generally rectangular pad that fits against said end wall and side walls, said pad extending beyond said base panel and over said extended cover.

3. (Once amended) The infant bed of claim 1 wherein

a pair of handles are provided, one in the vicinity of said end wall and the other on said cover extension, and

a fabric hinge is provided in said cover at a point beyond said base panel.

5. (Once amended) The infant bed of claim 4 wherein

each of said side walls has an inside surface and an outside surface covered by said cover, and

a plurality of pockets are provided on said cover on said outside surfaces.

7. (Once amended) A portable infant support unit comprising

a generally rectangular flat base panel having two parallel longitudinal sides and two parallel ends,

an end wall perpendicularly attached at one end of said panel,

a pair of parallel side walls perpendicularly attached along a portion of the two longitudinal sides of said panel and to said end wall,

a plurality of openings on the back of said base panel for receiving suction cups,

at least one pair of slots provided in said end wall for receiving a securement belt,

a fabric cover covering the base panel, side walls and end wall of said unit, said cover

having openings therein which correspond to the positions of said suction cups and slots, and a generally rectangular pad that fits inside said end walls and said side walls on top of said cover.

8. (Once amended) A portable infant bed comprising:

a. a support unit including

a generally rectangular flat base panel having two parallel longitudinal sides and two parallel ends,  
a first detachable end wall perpendicularly attached at one end of said panel,  
a second detachable end wall perpendicularly attached at the opposite side of said panel,

a first detachable partial side wall perpendicularly attached along one of the two longitudinal sides of said base panel and to each of said end walls, and  
a second detachable partial side wall perpendicularly attached along a portion of the opposite longitudinal side of said base panel and to one of said end walls, leaving a gap between said second side wall and said other end wall;

b. a fabric cover fitting over the base panel, side walls and end walls of said unit;

and

c. a generally rectangular pad that fits inside said end walls and said side walls on top of said cover.

9. (Twice amended) A portable infant bed comprising:

- a. a support unit including
  - a generally rectangular flat base panel having two parallel longitudinal sides and two parallel ends,
  - a first end wall perpendicularly attached at one end of said panel, a second end wall perpendicularly attached at the opposite end of said panel,
  - a first side wall perpendicularly attached along one of the two longitudinal sides of said base panel and to each of said end walls, and
  - a second partial side wall perpendicularly attached along a portion of the opposite longitudinal side of said base panel and to one of said end walls, leaving a gap between said second side wall and said other end wall wherein said base panel, end walls are integrated into a single unit;
- b. a fabric cover fitting over the base panel, side walls and end wall of said unit, and
- c. a generally rectangular pad that fits inside said end walls and side walls on top of said cover.

11. (Once amended) The infant bed of claim 10 wherein each of said side walls has an inside surface and an outside surface, and  
a plurality of pockets are provided on said cover on said outside surfaces.

16. (Cancelled)

17. (Cancelled)

18. (Cancelled)

19. (Twice Amended) A portable infant bed comprising:

a. an integrated support unit comprising

a generally rectangular flat base panel having two parallel longitudinal

sides and two parallel ends,

an end wall perpendicularly attached at one end of the base panel,

a first side wall perpendicularly attached along one of the two longitudinal

sides of the base panel and to the end wall;

a second side wall perpendicularly attached along the other of the two

longitudinal sides of the base panel and to the end wall;

b. a fabric cover fitting over the base panel, side walls and end wall of the unit, said cover extending beyond the opposite end of the base panel; and

c. a generally rectangular pad that fits between said side walls, said pad extending beyond the base panel adjacent to the extended cover.

23. (Twice amended) The infant bed of claim 21 wherein

a pair of handles are provided, one handle being in the vicinity of said end wall and the other on said cover extension, and

a hinge is provided in said cover at a point beyond said base panel.

25. (Twice amended) The infant bed of claim 19 wherein

each of said side walls has an inside surface and an outside surface covered by said cover,

and

a plurality of pockets are provided on said cover on said outside surface.

26. (Cancelled)

29. (Once amended) A portable infant bed comprising:

a. an integrated support unit including

a generally rectangular flat base panel having two parallel longitudinal

sides and two parallel ends,

a first end wall perpendicularly attached at one end of said panel,

a second end wall perpendicularly attached at the opposite end of said

panel,

a first side wall perpendicularly attached along one of the two longitudinal

sides of said base panel and to each of said end walls, and

a second partial side wall perpendicularly attached along a portion of the

opposite longitudinal side of said base panel and to one of said end walls, leaving

a gap between said second side wall and said other end wall;

b. a fabric cover fitting over the base panel, side walls and end walls of said unit; and

c. a generally rectangular pad that fits inside said end walls and said side walls adjacent

said cover.

31. (Cancelled)

32. (Cancelled)

33. (Cancelled)

34. (Cancelled)

35. (Once amended) A portable infant support unit comprising  
a generally rectangular flat base panel having two parallel longitudinal sides and two  
parallel ends,

an end wall perpendicularly attached at one end of said panel,  
a first side wall perpendicularly attached along one of the two longitudinal sides of the  
base panel and to the end wall, and  
a second side wall perpendicularly attached along the other of the two longitudinal sides  
of the base panel and to the end wall,  
at least one opening on the back of said base panel for receiving suction cups,  
a fabric cover covering the base panel, side walls and end wall of said unit, said cover  
having at least one opening therein corresponding to the position of each suction cup, and  
a generally rectangular pad that fits between said side walls on top of said cover.

36. (Once amended) A portable infant support unit comprising

a generally rectangular flat base panel having two parallel longitudinal sides and two  
parallel ends,  
an end wall perpendicularly attached at one end of said panel,

a first side wall perpendicularly attached along one of the two longitudinal sides of the base panel and to the end wall, and

a second side wall perpendicularly attached along the other of the two longitudinal sides of the base panel and to the end wall,

at least one pair of slots provided in said end wall for receiving a securement belt,

a fabric cover covering the base panel, side walls and end wall of said unit, said cover having at least one opening therein which corresponds to the position of each slot, and

a generally rectangular pad that fits between said side walls on top of said cover.

37. (Cancelled)

40. (Once amended) The infant bed of claim 30 wherein [wherein] said cover has at least one opening therein corresponding to the position of each strap.

41. (Once amended) The infant bed of claim 29 wherein [wherein] each of said side walls has an inside surface and an outside surface covered by said cover, and

at least one pocket provided on said cover on at least one of said outside surfaces.

42. (Once amended) The infant bed of claim 29 wherein [wherein] each of said side walls has an inside surface and an outside surface covered by said cover, and

at least one pocket is provided on said cover on at least one of said inside surfaces.
